Paper Title

Maverick: Discovering Exceptional Facts from Knowledge Graphs

Track Name

Research Paper First-Round

META-REVIEWER #1

META-REVIEW QUESTIONS

1. Group leader summary

The paper addresses a new and relevant problem, namely discovery of exceptional facts in knowledge graphs. The authors are encouraged to substantially revise their paper to address the issues identified by the three reviewers. In particular, it is necessary to better and earlier define exceptionality, to discuss more related work and to improve on the evaluation.

2. Comments on the revised paper (if appropriate)

The reviewers found that their concerns have been sufficiently addressed so that the revised paper is acceptable. The authors are recommended to publish auxiliary material on <https://zenodo.org/> instead of Dropbox.

3. Decision on the revised paper (if appropriate)
